

THE FLIP DECK

36-card master prototype · the Nine Signs · every pair exactly once

1 Moon

2 Leaf

3 Wave

4 Flame

5 Eye

6 Mask

7 Key

8 Star

9 Crown

PRINTING

Print at 100% scale (no “fit to page”) on A4 cardstock.

Page 1 (this page): print single-sided, or skip it.

Pages 2–9: print DOUBLE-SIDED, flip on the LONG edge.

Check duplex alignment against the light; the 4 mm frame inset forgives a couple of millimetres of drift.

Cut along the dashed guides: 9 cards per sheet, 36 total.

Standard 63.5 × 88 mm sleeves fit. There is no card back — both sides are faces, so opaque sleeves are wasted here.

THE DECK

Each card shows one sign on each side; every possible pair of the nine signs appears on exactly one card ($36 = 9 \times 8 \div 2$).

The pip (1–9) is the authoritative rank: Moon 1 (lowest) ...

Crown 9 (highest). The sign's name and picture never override the number. The top-edge chevron marks “up” and is identical on every face — nothing reveals a card's hidden side.

Sub-decks remove from the top: signs 1–6 (15 cards), 1–7 (21) or 1–8 (28) each form an exact smaller all-pairs deck.

SORTING AFTER PLAY

To verify the deck: lay cards in rows by their lower sign - row 1 holds 1+2 ... 1+9 (eight cards), row 2 holds 2+3 ... 2+9 (seven), and so on. A missing card names itself.
